

# SP001 TANK INSPECTIONS

For aboveground shop-built or field-erected tanks (ASTs) storing as much as 50,000 gallons of flammable or combustible liquid, the Steel Tank Institute's **SP001 Standard is the most accepted by the EPA** regarding *Suitability for Continued Service* certifications.

**ECA's** highly qualified tank inspection team comprises ...  
Certified Aboveground Tank Inspector and Tank System Inspector  
Level 2 non-destructive testing (NDT) professionals with as much as 30 years experience

**Our detailed Inspection Reports discuss findings and offer cost-effective remedial recommendations.**

Our Lead Tank Inspector is a registered Professional Engineer (PE) who helps clients stay in compliance with the Spill Prevention, Control and Countermeasure (SPCC) regulation 40CFR112, by preparing facility-specific SPCC Plans. As per 40CFR112.8(c)(6), SPCC Plans require tank integrity inspections as follows:

- + "... inspect each ... container for integrity on a regular schedule and whenever you make material repairs."
- + "... determine, in accordance with industry standards, ... the frequency and type of testing and inspections"
- + "... take into account container size, configuration and design (... shop-built, field-erected...)."
- + "... (perform) integrity tests (that) include ... ultrasonic testing, ... or other systems of NDT."
